## **HIGHER AGRICULTURE EDUCATION IN THE KINGDOM OF SAUDI ARABIA AND ITS ROLE IN THE FUTURE**

**Abdulrahman I. Al-Mogel**

Department of Agricultural Economics & Extension  
College of agricultural and Food Sciences, King Faisal University  
Al-Hassa, Kingdom of Saudi Arabia.

### **Abstract**

The main purpose of this study was to determine the future roles and responsibilities of the higher agricultural education in the Kingdom of Saudi Arabia to overcome the educational challenges and requirements of the next centenary, currently faced by the world. These challenges include, labour market, agricultural sciences and technology, production techniques and procedures. Also this study aimed at determining the present status of the higher agricultural institutions in the Kingdom and their curriculum. To achieved these objectives, the author of this study depends mainly on the review of some related literature and arrived at certain recommendations resulting from this study.
